

Material Safety Data Sheet
Date: March, 2nd 2009

Identification : Labelwriter paper labels

1. Company : Dymo bvba
Industriepark Noord 30
9100 St-Niklaas
Belgium
Telephone : +32 (03) 778 85 11
Fax : +32 (03) 776 51 81

PRODUCT DESCRIPTION

Self adhesive labels and transfer adhesive laminates
This datasheet covers the products listed in our standard range and other product information documents.

INTENDED USE

The products are intended for use in general and specific label applications. Information relating to individual product performance can be obtained from particular product information sheets. Detailed information is available from our sales office.

COMPOSITION

Our products are based on papers of conventional papermaking formulations, synthetics, waterbased acrylic adhesives and solventless silicones, which have been selected as non toxic and are listed under European/US food packaging regulations or are generally recognised as safe for use in limited contact with foodstuffs.

HAZARDS

Health Hazard : there are no known hazards associated with the use of these products

Fire Hazard: these products will burn if ignited. Conventional extinguishing medium can be used, depending on the local circumstances

Environmental Hazard : no known environmental hazards are associated with these products

STORAGE AND USE

Adhesive coated product should be stored away from sources of ignition, radiant heat and sunlight.

The optimum label manufacturing and storage conditions for these products are 20-22°C and a relative humidity of 50-55%.

For advice on the handling and storage of these products, please see the trade recommendations issued by FINAT or EPSMA
